

□

Dear Indoor Football League Teams,

First off, greetings to those who already know me.

Here is the proposal I wish to make the teams of the IFL for the 2010 season:

Now through the end of the season – or the year – I will provide teams unlimited full audio production to be used as radio, TV and/or facility spots/announcements. Script to be provided by an authorized team representative with pronunciation guides where needed (uncommon names and/or words). Production can usually be done on a same-day delivery and turn around via e-mail to teams and/or broadcast outlets though my schedule fluctuates. However, if an agreement can be made based on the minimum participation described below, I will dedicate Mondays throughout the season/year for nothing but IFL production.

Unless otherwise requested, audio will be delivered via e-mail in mp3 format. Any broadcast outlet requirements such as Insertion Orders and Flight Schedules must be secured and agreed upon between the media outlet and the team its self.

Fee for this service is **\$150.00 per month per team** based on a **minimum five (5) team participation**. **Participation of less than five teams, fee will be \$200.00 per month per team** but all elements described above remain intact. All invoices must be paid no later than 10 working days of receipt of the invoice. Invoices will be e-mailed in Word format on the last working day of the month for which service was provided.

My offer to the teams of the Indoor Football League is affordable, top-quality production and the promise of fast turnaround and the ability to handle sudden need audio such as special events, sponsor changes and the like.

Thank you for your consideration. I look forward to the opportunity to serve you. Please contact me with any questions you may have.

Sincerely,

Michael J. Stevens
